INDEX

Absorption of carbohydrate, the effect of fat on the, 175.
Acute ileocolitis in children, 339.
Adolescence, pituitary obesity in, 309.
Adolescent goitre, some factors of significance in, 133.
Aetiology of tetany in children, some factors concerned in the, 62.
Anaesthesia, changes in the blood in, 261.
Association of Physicians of Great Britain and Ireland, Proceedings of the, *at end of volume.*
Ataxia, hereditary, the mode of inheritance of, 351.

Basal metabolic rate, the relation between the, and the pulse-pressure in conditions of disturbed thyroid function, 36.
Block, sino-auricular, a case of, 335.
Blood, changes in the, in anaesthesia, 261; cholesterol in the, in cases of gall-stones, 123; the sugar content of the, in normal and under-nourished children, 175.
Blood-urea, the, and its estimation in diabetes mellitus, 241.
Body, the tolerance of the, for urea in health and disease, 274.
British Isles, the geographical distribution of exophthalmic goitre in the, 191.

Calcium and magnesium in some pathological sera, 288.
Carbohydrate, the absorption of, the effect of fat on, 175; tolerance in myxoedema, 327.
Case of sino-auricular block, a, 335.
Changes in the blood in anaesthesia, 261.
Children, acute ileocolitis in, 339; aetiology of tetany in, some factors concerned in the, 62; the sugar content of the blood in normal and under-nourished, 175.
Cholesterol in the blood in cases of gall-stones, 123; in health and disease, 393.
Clinical study, a, of van den Bergh's test in jaundice, 19.
Coma, diabetic, the relation of infection to, 294.
Congenital dextrocardia, four cases of, 335.

Dextrocardia, congenital, four cases of, 335.
Diabetes mellitus, the blood-urea and its estimation in, 241.
Diabetic coma, the relation of infection to, 294.
Disease, cholesterol in health and, 393; polycystic, of the kidneys, heredity in, 359; the tolerance of the body for urea in health and, 274.
Disturbed thyroid function, conditions of, the relation between the basal metabolic rate and the pulse-pressure in, 36.

Effect of fat, the, on the absorption of carbohydrate, 175.
Encephalitis, epidemic: the second Winnipeg outbreak, 153; the spinal fluid sugar in, 300.
Epidemic encephalitis: the second Winnipeg outbreak, 153.
Erythrodermia, lymphoblastic, 250.
Exophthalmic goitre, the geographical distribution of, in the British Isles, 191.

Factors, some, concerned in the aetiology of tetany in children, 62; of significance in adolescent goitre, 133.
Fat, the effect of, on the absorption of carbohydrate, 175.
Four cases of congenital dextrocardia, 335.

Gall-stones, cholesterol in the blood in cases of, 123.
Geographical distribution, the, of exophthalmic goitre in the British Isles, 191.
Goitre, adolescent, some factors of significance in, 133; exophthalmic, the geographical distribution of, in the British Isles, 191.

Haemorrhage, spontaneous subarachnoid, 93.
Health and disease, cholesterol in, 393; urea in, the tolerance of the body for, 274.
Hereditary ataxia, the mode of inheritance of, 351.
Heredity in polycystic disease of the kidneys, 359.
Hyperthyroidism in man, the effect of iodine on, 1.

Ileocolitis, acute, in children, 339.
Infection, the relation of, to diabetic coma, 294.
Inheritance of hereditary ataxia, the mode of, 351.
Iodine, the effect of, on hyperthyroidism in man, 1.

Jaundice, a clinical study of van den Bergh's test in, 19.

Kidneys, polycystic disease of the, heredity in, 359.

Lipodystrophy, progressive, 224.
Lymphoblastic erythrodermia, 250.

Magnesium, calcium and, in some pathological sera, 288.
Man, the effect of iodine on hyperthyroidism in, 1.
Metabolic rate, basal, and the pulse-pressure in conditions of disturbed thyroid function, the relation between the, 36.
Mode of inheritance, the, of hereditary ataxia, 351.
Myxoedema, carbohydrate tolerance in, 327.

Nephritis associated with oedema, on the pathology of, as illustrated by six cases, 77.
Normal and under-nourished children, the sugar content of the blood in, 175.

Obesity, pituitary, in adolescence, 309.
Oedema, as illustrated by six cases, on the pathology of nephritis associated with, 77.

Pathological sera, calcium and magnesium in some, 288.
Pathology of nephritis associated with oedema, on the, as illustrated by six cases, 77.
Physicians of Great Britain and Ireland, Proceedings of the Association of, *at end of volume.*
Pituitary obesity in adolescence, 309.
Polycystic disease of the kidneys, heredity in, 359.
Progressive lipodystrophy, 224.
Pulse-pressure in conditions of disturbed thyroid function, the relation between the basal metabolic rate and the, 36.

Recovery after removal of a suprarenal tumour, 143.
Relation of infection, the, to diabetic coma, 294.
Removal of a suprarenal tumour, recovery after, 143.

Second Winnipeg outbreak of epidemic encephalitis, 153.
Sera, pathological, calcium and magnesium in some, 288.
Sino-auricular block, a case of, 335.
Spinal fluid sugar, the, in encephalitis, 300.
Spontaneous subarachnoid haemorrhage, 93.
Subarachnoid haemorrhage, spontaneous, 93.
Sugar, the spinal fluid, in encephalitis, 300; content, the, of the blood in normal and under-nourished children, 175.
Suprarenal tumour, a case of virilism associated with a, 143.

Tetany in children, aetiology of, some factors concerned in the, 62.
Thyroid function, conditions of disturbed, the relation between the basal metabolic rate and the pulse-pressure in, 36.
Tolerance, carbohydrate, in myxoedema, 327; of the body for urea in health and disease, the, 274.
Tumour, suprarenal, a case of virilism associated with, 143.

Under-nourished children, normal and, the sugar content of the blood in, 175.
Urea, the tolerance of the body for, in health and disease, 274.

van den Bergh's test in jaundice, a clinical study of, 19.
Virilism, a case of, associated with a suprarenal tumour, 143.

Winnipeg, second outbreak of epidemic encephalitis, 153.
